

PRESS RELEASE

September 28, 2018

ULLMAN UNVEILS NEW PRODUCTS AT 2018 AAPEX SHOW IN LAS VEGAS, NEVADA.

Ullman-Devices will show off new technology at the show!

Chicago, IL. (Sept. 28, 2018) – Ullman Devices has long been one of the Nation’s top specialty tool manufacturers supplying several industries with unique solutions that simplify often very complex situations in the repair process. They have been regularly heralded as one of the best design manufacturer companies in the industry since their inception back in 1935. They offer a wide variety of specialty devices to various repair industries.

STOP! You will not want to miss this! Ullman Devices will be launching two brand new specialty products at the AAPEX Show in Las Vegas, Nevada. You will have the opportunity to get an up close and personal first-hand look at the New Ullman Metal Marker, and the New Ullman Digital Mirror. Both of these devices are a must have for the professional technician. Visit booth #856 in the “TOOL & EQUIPMENT” section on the second floor of the “Sands Expo Center” and get a demonstration. The show runs from October 30th thru November 1st of this year.

Ullman’s “Metal Marker” allows you to personally brand all your tools, your tool box, and just about anything else metal that you want your name on. Ullman’s goal is to help you protect your considerable investment. The new “Digital Mirror” will be your new window to the undiscovered. This handy device allows you to get a good look at and document those hard to see areas that you can’t put your eye on. Just use the telescoping wand with camera and get into the areas you need to see. You can even view on your smartphone and take a picture of it for your records.

If you are going to be at AAPEX stop by to see these new products in action. They will be having live demonstrations which you can actually take part in, so you can see the ease with which these devices operate. Prepare to be impressed with the technology they have developed that will help users work smarter, not harder, and ultimately be more productive.

About Ullman-Devices

Headquartered in Chicago, Illinois and Ridgefield, Connecticut, Ullman Devices is an award winning, national design manufacturer of specialty devices used across the country.

Ullman’s product line has allowed its customer base to augment their existing tool selection which in turn affords them the opportunity to work smarter, faster, and be more profitable.
